LPG TAIWAN 2016

THE FUTURE OF LPG DEVELOPMENT IN TAIWAN –
THE CHALLENGES IN MODERNIZING TAIWAN'S LPG INDUSTRY

24 - 26 AUGUST 2016 | CPC HEAD OFFICE, TAIPEI, TAIWAN

With an annual demand hovering at 2.5 million metric tonnes every year, the LPG industry in Taiwan is very mature and has reached saturation point and LPG demand has been falling steadily by 1 – 2% every year as piped natural gas replaces LPG use. However, as energy needs are complex, LPG will still play an important role in Taiwan's energy mix and the proper management of the natural gas/LPG ratio in Taiwan is very important to ensure energy security and continued access to energy for economic growth.

This discussion however, is not evident in Taiwan's energy policy and there is no clear direction from the government about the future of LPG/NG in Taiwan. The LPG Taiwan Forum is thus a timely response to ensuring the sustainable development of LPG in Taiwan, by providing a convenient platform to meet and address key issues for sustainable LPG growth in the region.

SITE TOUR (24 AUG 2016)

Visit to CPC Corporations' LPG Import Facility and Refinery

CPC is Taiwan's state-owned oil and gas company. As an enterprise in state ownership, it is responsible not only for returning profit to the government but also for supplying sufficient energy to the domestic market. CPC's business areas include oil & gas exploration and production, refining, petrochemicals, lubricants, solvents and chemicals; it is also Taiwan's sole importer and supplier of natural gas. CPC is committed to sustainability in corporate operations, as evidenced by its membership of the World Business Council for Sustainable Development (WBCSD) since 2006. CPC supplies the bulk of the LPG supply for Taiwan, importing over 46% of Taiwan's total LPG demand of 2.5 million MT, and produces over 800,000 MT of LPG from its refineries every year.
